
Material properties and specification - at a glance

■ Conbextra GP - void filling cementitious grout

Specification

The cementitious grout shall be Conbextra GP by Fosroc, supplied as a ready to use dry powder. With the addition of water it shall produce a non-shrink void filling grout. The cured material shall exhibit performance characteristics as listed opposite.

Properties

Comp. str. : 64 N/mm²

Flex. str. : 11 N/mm²

Modulus of

Elasticity : >28000MPa

■ Rendercure - Renderoc curing membrane

Specification

The curing compound for repairs shall be Rendercure, by Fosroc, supplied as a low viscosity, single component, white liquid which dries to form a clear film. It shall exhibit performance characteristics as listed opposite.

Properties

Curing

efficiency : 90%
